#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because they contain details in the Japanese language. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the

applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3,7-9,11-13,18,21 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Soto et al. (2003/0081240).

With respect to Claim 1-2 and 21, Soto teaches the step of performing pre-communication with an external device (digital camera) before print data are obtained from the external device (digital camera) in paragraphs [0017] and [0020], the step of obtaining print data in paragraph [0020], the step of setting a print condition in paragraph [0022] , the step of printing on the front page diagram @ 350, the reception unit (printer) is specified according to the content of the pre-communication and the print

condition is set to the reception unit (printer) specified in paragraphs [0019] and [0022]. With respect to Claim 3, Soto teaches the wireless connection between the external device and the reception unit in paragraph [0017]. With respect to Claim 7, Soto teaches the information for designating the reception unit(printer) in paragraph [0019] and that the print condition is set in accordance with the information for designating in paragraph [0019] and the front page diagram @ 330-340. With respect to Claim 8, Soto teaches the lookup table (database) correlating the reception unit and the print condition and that the print condition is set based on the lookup table and information for designating in paragraphs [0022] and [0024]. With respect to Claim 9, Soto teaches the identifier on the front page diagram @ 330. With respect to Claim 11, Soto teaches the operation of ejecting liquid onto the medium(color setting or color emulations) in paragraph [0022]. With respect to Claim 12, Soto teaches that printing is based on pixel data (quality levels) a created from the printing data in paragraph [0022]. With respect to Claim 13, Soto teaches the print condition, identifier and that the print condition is prepared in advance on the front page diagram and paragraphs [0020] and [0022]. With respect to Claim 18, Soto teaches the communications protocol (infrared or wireless network) in paragraph [0017].

***Allowable Subject Matter***

6. Claims 4-6,10,14-17 and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The Examiner reserves comment until the entire instant invention is in condition for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles H Nolan, Jr. whose telephone number is 571-272-2171. The examiner can normally be reached on Monday through Thursday 8:00 AM to 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached on 571-272-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
